

Antelope Valley

Specialty care services at the Lancaster Medical Offices include allergy, cardiology, dermatology, endocrinology, gastroenterology, head and neck surgery, infectious disease, obstetrics-gynecology, ophthalmology, optometry, orthopedics, podiatry, physical therapy, respiratory therapy, rheumatology, social services, speech therapy, surgery, urgent care, and urology.

The Lancaster Medical Offices also offer laboratory, pharmacy, and radiology services. Another campus houses the mental health services including addiction medicine.

The Palmdale Medical Offices, which opened in 2003, occupy a 47,000 square-foot building and provide medicine, internal medicine, obstetrics-gynecology, pediatrics, family neurology, and endocrinology, as well as laboratory, pharmacy, and radiology services. In addition, a Health Education Center features a video library, a health store, family education rooms, and conference rooms.

To better serve the growing membership, a 34,000 square-foot expansion of the Lancaster campus featuring 15 additional urgent care beds, 5 of which can be used as observation beds, and space for orthopedic, podiatry, dermatology, head and neck, and urology services. The expansion also will include an X-ray room, lab space, and several conference rooms.
