

# Downey Medical Center

## Experience the future of health care

### Care in many languages

Through our Qualified Bilingual Staff program, we identify and qualify caregivers who can assist members in Spanish, Cantonese, Mandarin, Vietnamese, Tagalog, and American Sign Language. Members may also use our AT&T Language Line telephone interpreters for help in 140 languages, including Hindi, Russian, Farsi, and more.

### By the numbers

Opened in 2009, the 657,000-square-foot Kaiser Permanente Downey Medical Center offers high-quality care in a family-friendly environment. Featuring mostly private rooms, the facility also includes a labor and delivery department with 18 private birthing and recovery suites. Other features include:

- 424 physicians
- 49-bed Emergency Department
- 352 beds
- 95% private rooms
- 8-bed pediatric intensive care unit
- 24-hour pharmacy

### Building for the future

Our 33-acre medical center campus includes the Garden and Orchard medical offices and the new hospital. The new hospital is equipped with the most advanced medical technologies available—including operating rooms with high-definition cameras. It replaces our current hospital in Bellflower (which will remain open as medical offices but will no longer offer emergency services or a 24-hour pharmacy) and allows us to offer more services to meet the needs of this growing community.

### An environmentally friendly medical center

The Downey Medical Center was built with the environment in mind—it's 15 percent more energy-efficient than the industry benchmark requires. Here's how a green facility helps promote the well-being of our members, caregivers, and the community:

- Carpeting is made with recycled materials that won't release cancer-causing chemicals.
- Inside air is kept fresh because nothing is recirculated—100 percent of the air supply is brought in from outside.
- Large windows and open interiors reduce the need for artificial lighting.

### Smart planning creates comfort and convenience

Thoughtful design, comfortable furnishings, and inspiring artwork help us maintain a restful, healing environment for members. Designed to capture natural light, the hospital features a main concourse that provides easy access to high-traffic facilities such as member services, the pharmacy, a gift shop, and a centrally located cafeteria with an outdoor courtyard. Spacious visiting areas and a quiet meditation room give friends and family relaxing places to gather.
