

Los Angeles Medical Center

A leader in research, technology and specialized care

Care in many languages

Communicating about health concerns is difficult enough without a language barrier. That's why the Los Angeles Medical Center has caregivers who are trained to provide care in other languages, including Spanish, Cantonese, Mandarin, Vietnamese, and American Sign Language. And in the exam room, our telephone language line interpreters who speak Spanish, Hindi, Russian, Cantonese, Mandarin, Tagalog, Farsi, and more.

By the numbers

Members make more than 750,000 visits to the Los Angeles Medical Center each year—making it one of the largest hospitals and medical learning institutions in Los Angeles. Our new 792,000-square-foot, environmentally friendly hospital building expands our ability to deliver high-quality care.

- 507 beds
- 16-bed pediatric care unite
- 700 physicians
- More than 85% private rooms

A Center of Excellence in specialty care for Southern California

The Los Angeles Medical Center is a cutting-edge specialty care center and the regional research leader in bone marrow and organ transplants, employing many board-certified physicians and surgeons who teach at renowned universities such as the University of Southern California and the University of California at Los Angeles. Members with especially complicated conditions are referred from facilities across the region—and sometimes from as far away as Oregon and Colorado. The hospital features 20 highly specialized care units, including:

- A comprehensive cancer program
- Neonatal and Pediatric intensive care
- Radiology/Oncology
- Cardiac care
- Neurosurgery
- Spine surgery
- Children's specialty care

Supporting the diverse needs of our community

Caregivers at this hospital have partnered with our Institute for Culturally Competent Care to ensure all members can easily access care. Throughout the facility, signs appear in a variety of languages. Caregivers respect the unique cultural beliefs and practices of our Latino, Armenian, and Chinese members and offer care for the medical conditions most common to these communities.

The next generation of health care facilities

Our new seven-story hospital building makes innovative use of art and natural lighting to complement some of the most advanced medical technologies available—including digital radiology and operating rooms equipped with high-definition cameras. More than 85% of the beds are in family-friendly private rooms, featuring pull-out beds for overnight stays and wireless Internet access.
